

Mio LINK replaces the chest strap used with conventional heart rate monitoring devices. Connect to GPS watches, bike computers, and smartphones without the discomfort and chafing!

LINK is perfect for

Runners and cyclists
who hate wearing a
chest strap with their
current fitness device

OR

Athletes who
like seeing their
current heart rate zone,
but don't need a
numerical display

Features

- EKG-accurate heart rate data, no chest strap required!
- 6-color LED to indicate your current heart rate zone (configured with the Mio GO app)
- Bluetooth Smart (4.0) heart rate transmission to iPhone and Android smartphones
- ANT+ transmission to bike computers and GPS watches
- 7-10 hour battery life
- Waterproof to 30m (3ATM)
- Easy one-button operation
- Compatible with Mio GO and third party apps such as MapMyRun, Strava, Endomondo, Runkeeper, Wahoo Fitness, and more
