# METHOD™

## DualLock™ Tech

Two proprietary technologies work together to deliver our most secure fit.

### StickyGels™ Tech

The unique shape and blend of silicone grips the ear 30% better than regular gels when you start to sweat.

### Fix® Tech

Hook-shaped design sits in the v-shape of the ear to resist tugging or pulling, keeping ear buds in place.

## Sweat Resistant

Earbud housing and mic are sonically welded to block out the elements: sweat, water, rain.

## Pureclean™ Tech

Invisible coating on ear gels prevents build up of sweat & oils.

## Universal Mic/Remote

Take calls or manage music on virtually any smart device.

- play/pause, answer/end
- track forward
- track backward
- voice command
