

FUSE is a performance heart rate monitor, activity tracker and sport watch, all in a single wristband. Monitor your workout heart rate and your all-day activity for a complete assessment of fitness, exertion, and calorie burn.

FUSE is perfect for

Athletes who want
their workout heart
rate data and daily
activity tracking all
in one device

Features

- EKG-accurate heart rate data, no chest strap required!
- All-day monitoring of steps, distance, & calories
- In-workout tracking of heart rate, calories, and accelerometer-based steps, distance, & pace
- Wireless data syncing to the Mio GO app
- 6-color LED to indicate your current heart rate zone (configured with the Mio GO app)
- Bluetooth Smart (4.0) heart rate transmission to iPhone and Android smartphones
- ANT+ transmission to bike computers and GPS watches
- Approximately 7 days of battery life, if heart rate monitoring is used 1 hour/day
- Waterproof to 30m (3ATM)
- 30 hours of workout data storage, 2 weeks of all-day activity storage
- Heart rate transmission to third party apps such as MapMyRun, Strava, Endomondo, Runkeeper, Wahoo Fitness, and more
