MIO SLICE

ALL-DAY HEART RATE + ACTIVITY TRACKER

Mio SLICE is the first wearable to capture your heart rate data all-day and translate it into your PAI score.

PAI, Personal Activity Intelligence, is a simple metric that tracks your body's response to all of your physical activity—more than just steps. It takes your heart rate and personal data and translates it into a meaningful and actionable score guiding you on how active you need to be to stay healthy.

SLICE also offers other features such as sleep tracking, calories burned, distance, and more—all from a stylish water-resistant wristband with simple one-button operation.

PERSONAL ACTIVITY INTELLIGENCE

See your PAI score on the SLICE band and also sync with the PAI app for more details.

ALL-DAY HEART RATE

Accurate, continuous heart rate monitoring.

ACTIVITY TRACKING

Tracks steps, distance, and calories burned.

SLEEP TRACKING

Monitor your sleep quality and resting heart rate.

SMARTPHONE NOTIFICATIONS

Receive call and text message alerts.
